MEMORANDUM FOR:

1. We need to indicate specifically to OCS the amount of support which we think we will need over the next five years. I would like to provide Briggs with two categories:

a. "For Certain List" and a "Probable List". The For Certain List is essentially the ADP runs which we have listed on the calendar chart and presumes about 500 contracts. The hard side of our input ought to expand these numbers and distributions appropriately to accommodate DDS&T NRO contracts.

25X1A

b. On the probability side, we should lash in all the other contracts for R&D in the Agency. I have some numbers for this which we can use. It will increase the number of contracts by or so. In the probable area, we should also consider whether additional runs or types of data would be required by the R&D coordination function for the Agency.

2. We should get this to Briggs by the end of next week. Let's discuss the runs which we now have scheduled or anticipated before you start writing anything down.
